

Member and Resource Guide

A practical way to find your next step, build useful skills and keep the resources that matter to you.

Real screens. Clickable destinations. A guide you can download and add to your own resource database.

Start at RiddickanCo and explore MOVARA

START HERE

Make your first visit useful

You can begin with one small task. Choose the route that fits what you need today.

1**Find a direction**

Explore career pathways, then choose one role or skill to investigate.

[Explore pathways](#)

2**Put your experience into words**

Use the guided résumé builder. Review and download your work before leaving the page.

[Build my résumé](#)

3**Practice one useful skill**

Try a free professional course or safety lab, and keep the work you produce.

[Open free courses](#)

4**Keep the useful resources together**

Sign in to reach your private saved-resource lab. Public profile visibility is a separate choice.

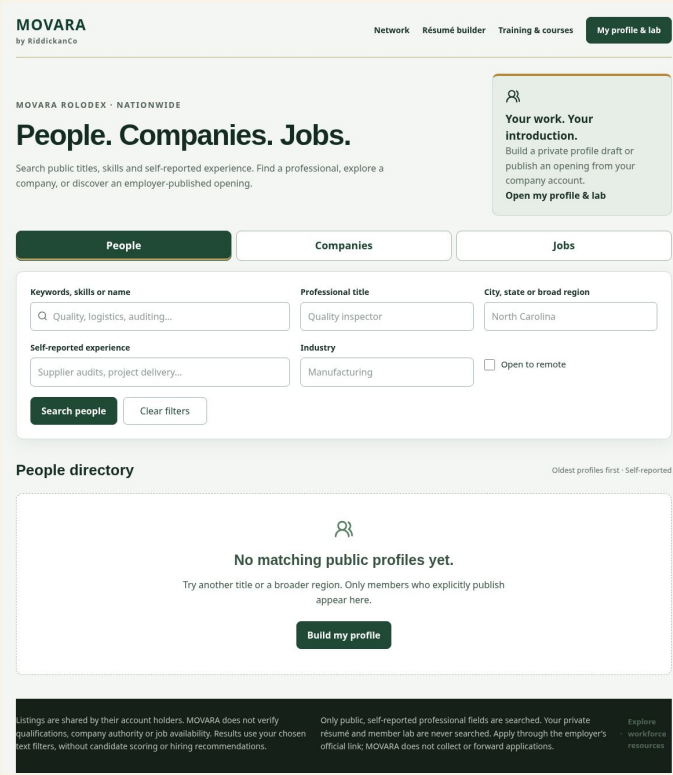

[Open my profile and lab](#)

For employers: use the company directory and job-posting route. Check the separate paid ISO training catalog when you need structured training.

THE MOVARA ROLODEX

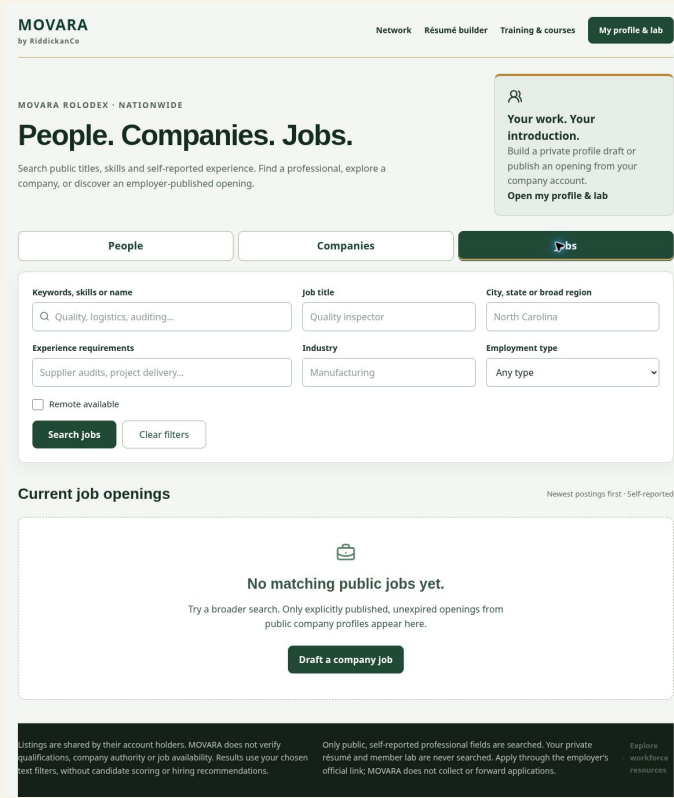

Find people and opportunities

People and companies choose whether to publish. Jobs are posted by company account holders.

People view: search public, self-reported profiles.

Start with a focused search. Choose People, Companies or Jobs. Add a title, useful keyword and broad location. Broaden filters if you get no matches.

Jobs view: search published, unexpired openings.

Make your own introduction. Use My profile & lab to work on your profile. Publish only the professional details you want others to find.

Search people

Find companies

Explore jobs

A growing community. The guide screenshots show no public profiles or jobs yet. Listings are self-reported. MOVARA does not verify qualifications, company authority or availability, and does not guarantee hiring. Apply through the employer’s official link; MOVARA does not collect or forward applications.

RÉSUMÉ SUPPORT

Show what your work changed

Start with real experience. Make it easy for someone else to understand your contribution.

RiddickanCo / MOVARA

Navigator Build your skills

RÉSUMÉ SUPPORT · FREE GUIDED DRAFT

You did the work.
Show the value.

Your résumé is your bragging sheet, backed by facts. Inventory what you've done, explain what changed because of your work, and help an employer see where you fit.

Your words stay in this page.

This builder formats your answers on your device. It does not upload them, send them to AI, or save them to an account or browser storage. Copy or download before leaving or refreshing. Don't enter SSNs, medical details, classified information or confidential employer data.

WHY THE BRAGGING SHEET MATTERS

Make your work visible.

An employer wasn't there when you solved the problem. Your résumé gives them the evidence: what you handled, what you contributed and why it matters for their role.

You don't need to exaggerate. You need to be specific.

STEP 1 OF 3

Inventory your experience

Start with the job you want. Then gather the experience that helps prove you can do it. All fields are optional; fill in what's useful.

What role are you working toward?

Quality technician, operations coordinator, team lead...

The guided builder opens with an experience inventory and a clear privacy notice.

1. Inventory your experience. Choose a target role, then gather responsibilities, projects and outcomes you can support with facts.

2. Show the value. Explain the action you took and the result. Use numbers only when you can verify them.

3. Review and download. Save your PDF and create a separate job-tailored version when helpful. Proofread every claim before sharing.

[Open the résumé builder](#)

The builder's on-page notice explains how your draft is handled. Download before leaving or refreshing. Keep confidential and sensitive details out.

FREE PROFESSIONAL LEARNING

Build a skill you can use

Choose one course and leave with an example of your own work.

Choose your course

About 45 minutes · 0/3 lessons

Professional Communication & Confidence

Speak with clarity when the stakes are real.

Enter course →

About 50 minutes · 0/3 lessons

Quality Thinking & Evidence

Turn a claim into a test you can explain.

Enter course →

About 50 minutes · 0/3 lessons

Data Decisions & Digital Workflow

Make a small data story that survives a second look.

COURSE / ABOUT 45 MINUTES

Professional Communication & Confidence

Leave with a status update, a question and a feedback script you wrote yourself.

0 of 3 lessons recorded · Your last open lesson resumes here

RIDDICKANCO ORIGINAL PRACTICE · BEGINNER → APPLIED WORK

Know what you're building.

No prerequisite for this free learning activity. Read the lesson, try the decision check, then write and revise your own work. Time estimates include practice; take longer when you need it.

By the end, you can practice

Write a status with a verified fact and an explicit uncertainty.

Your portfolio piece

A customer update, decision-changing question and handoff feedback script.

The course menu includes lessons, decision checks and practical writing exercises.

Professional Communication & Confidence Practice a clear update, a useful question and a feedback script.

Quality Thinking & Evidence Turn a claim into a check and explain the evidence behind your conclusion.

Data Decisions & Digital Workflow Practice a small data story and a workflow you can explain.

Choose a free course

Independent learning and completion records. These are not accredited certifications or a guarantee of employment.

SAFETY SKILLS AND TRAINING

Practice safer decisions

Use the free labs for everyday awareness, discussion and reflection.

The screenshot shows a web interface for 'Professional Development' on RiddickanCo. The header includes 'RIDDICKANCO / PROFESSIONAL DEVELOPMENT' and a link to 'All courses'. The main content area is titled 'SAFETY SKILLS / OPEN PRACTICE' and features the text 'See it. Hear it. Fix it. Check it.' in large, stylized fonts. Below this, it states: 'Five free, self-paced courses built around the people and decisions behind safer work. Join on this device, work through a scenario, and leave each lesson with a field note you wrote.' At the bottom of the main area, it shows '05 COURSES', '15 FIELD EXERCISES', and '01 CLEAR NEXT STEP'. On the right side, there are three numbered cards: '01 NOTICE' (orange), '02 LISTEN' (light yellow), and '03 VERIFY' (green). Below the main content, there is a 'Pick a skill' section with a 'Back to all courses' button and a progress indicator showing '01 / About 45 minutes · 0/3' and 'YOUR COURSE / 01'.

Five self-paced safety labs offer 15 field exercises and written practice.

Work through a scenario. Read the lesson, consider the decision and write your own field note. Use what you notice to ask better questions about the work around you.

Follow your employer's procedures and required training. Free labs are educational practice; they do not replace site-specific instruction, licensing or required safety qualifications.

[Open free safety labs](#)[Browse paid ISO training](#)

Paid ISO training has a separate catalog. Check each course's scope, price and terms.

YOUR PERSONAL RESOURCE DATABASE

Keep what you will use again

Save this PDF and the links that support your next step. Your own folder, notes app or spreadsheet works.

Set up one simple record for each useful resource. Copy the destination from the link directory on the next page. Add a short reason to return so the link does not become another forgotten bookmark.

Resource name	Example: MOVARA résumé builder
Link	The exact page URL, not a search-results page
Purpose or category	Résumé, learning, safety, networking or training
My next action	Example: draft two accomplishment statements
Date checked	Record when you last confirmed the link or information
My notes	What helped, what to verify and where you saved your work

Use the member lab when you want saved resources in your account. Sign in through My profile & lab. Your private saved resources are separate from the public directory. Choosing to use the lab does not mean you need to publish a public profile.

Open my private resource lab

Keep a downloaded copy of your résumé, learning work and this guide in a place you control.
